

TAKE A WALK ON THE WILD SIDE.

ENJOY THE FREEDOM OF AN OFF-ROAD ADVENTURE WITH THE YIPPIEYO CROSSBUGGY.

Tired of pushing your stroller up and down the same old road? Heading off to the countryside with no suitable pushchair to take along? Go off-road and experience the outdoors with the YippieYo Crossbuggy, a completely new, safe and high-quality off-road buggy for two children aged from one to six. The innovative and light-weight aluminium frame ensures stability and agility even in difficult terrain. The combination of just one axle, 14 inch wheels, a generous amount of ground clearance, comfortable suspension and stable disc brakes make the all-terrain buggy unbeatable when out and about. While parents fancy the immensely enhanced mobility compared to regular pushchairs, the kids also enjoy the “hop-on, hop-off” roadster feeling. The Crossbuggy is easy to take along as well: Just fold backrest and drawbar and dismount the wheels and it will fit in almost any boot.

Impeccable quality, safety certification, and sustainable production. Made in Switzerland.

Sustainability is key to YippieYo. Each Crossbuggy is produced in Switzerland and is free of any

harmful substances. The manufacturing process is much closer to a high-end mountain bike than to an ordinary pushchair: aluminium free-forming, high-quality welding, individual powder coating, and use of disc brakes are just some of its unique features. Notably, the Crossbuggy has passed an extended endurance and safety test and has been granted the renowned German GS-certification (Guaranteed Safety). ■

The Crossbuggy can be ordered and configured online at www.yippieyo.com.

TEST MUMS & DADS WANTED.

Let's do things together.

You get a free YippieYo Crossbuggy, we get weekly social media posts and pictures.
